Madrid | Calle Joaquín Turina, 2 | 28224 Pozuelo de Alarcón | 91 351 50 90

REDUCE COMPLEXITY IN ADAPTING TO PLANNING

CHALLENGE

Improve efficiency and accuracy of the fleet of trucks for national distribution

Lower operative costs

Foresee the need for trucks depending on the production and demand

SAIMA LOGISTIC OPTIMIZATION

RESULT

Increased efficiency and accuracy in terms of availability of the truck fleet

Greater flexibility and capacity for the creation of distribution scenarios

Reduction of distribution

THE SOLUTION

The control of transport to and from the company, the optimal management of warehouses, the procurement of manufacturing lines, the fair allocation of resources, the management of materials and the finished product have been key to excellence in operations..

Our solution helps define, model, simulate and implement the order distribution strategy, reducing risks and the complexity of planning.

Our client has 20 logistics centres, 5 factories, 12 different transport models and thousands of products. Making a correct forecast of logistics needs is essential to optimize moving costs.
